KELLEY TECHNOLOGIES MAKES A SURE BET WITH JBL PROFESSIONAL CONTROL 300 SERIES AT RED ROCK CASINO RESORT SPA IN LAS VEGAS

LAS VEGAS, NEVADA, March 16, 2006 — In an example of the consistent directivity and high fidelity of the JBL Professional Control 300 Series large format in-ceiling loudspeakers, Network Installation Corp.'s wholly owned subsidiary Kelley Technologies recently designed and installed an expansive audio/video system at the new Red Rock Casino Resort Spa in Las Vegas, NV. The system features distributed audio throughout the casino and hotel via BSS Soundweb, and the four ballrooms totaling 50,000 square feet of space feature 60 JBL Control 321CT loudspeakers and 70 JBL Control 322CT loudspeakers.

Kelley Technologies has worked with Station Casinos Inc., the corporation that owns Red Rock Casino Resort Spa, installing audio/video systems in several existing properties, including Santa Fe Station, Texas Station, Sunset Station and Green Valley Ranch Resort. With a skyrocketing population in Las Vegas, Station Casinos has filled a niche market by providing high-end casinos targeted for Las Vegas residents. Set to open on April 18, 2006 Red Rock Casino Resort Spas poised to stake its claim as a premier casino in Las Vegas, boasting the largest sports book in the city.

A Harman system solution comprises the audio throughout the Red Rock Casino Resort Spa with distributed audio networked via BSS Soundweb throughout the common areas, restaurants, outdoor pool areas and hotel suites. The system is powered by Crown amplifiers, and features AKG microphones and dbx processing.

The ballroom area, which may be configured into 20 rooms of various sizes, boasts a total of 130 loudspeakers from the Control 300 Series. Because of the high ceilings in the ballrooms (32 feet in the largest room), the challenge of providing intelligible sound called for a powerful, sonically accurate in-ceiling loudspeaker. "The high ceilings are always tough, and the Control 300 speakers really cut through at those center frequencies where there's always a lot of noise," said Dick Berg, audio designer, Kelley Technologies.

Other areas of Red Rock Casino Resort Spa feature other speakers from the JBL Control family, such as the outdoor pool area, which contains JBL Control SB210 compact subwoofers. Some of the restaurants and common areas have Control 26DT in-ceiling speakers, as well as Control 19CST in-ceiling subwoofers.

“We really went upscale on this particular installation,” Berg said. “Station Casinos told us they wanted the best, so we gave them the best.”

About Network Installation:
